

What We Do / Learning / Persuasive Communicator

Persuasive Communicator

Persuasive Communicator is a 2-day communication skills training workshop in which participants develop tools for communicating more powerfully and persuasively in any type of business situation. The methodology, based on Persona Global's *Social Styles* and *Trust Building* models, is easy to learn and immediately applicable to real-life work challenges.

Participants receive feedback on how business associates perceive their natural communication style, the ability to project empathy and their level of interpersonal flexibility. This information is used to tailor a course of action for communicating more effectively.
