

## eValue® Strategic Organisational Survey

Instant feedback on strategic performance. Customised online survey provides real-time, multi-perspective management information. Identify obstacles, take corrective action, monitor results, drive performance.

eValue® is a unique strategic survey tool that provides a multi-perspective view of organisational performance. Survey questions are linked to strategic objectives.

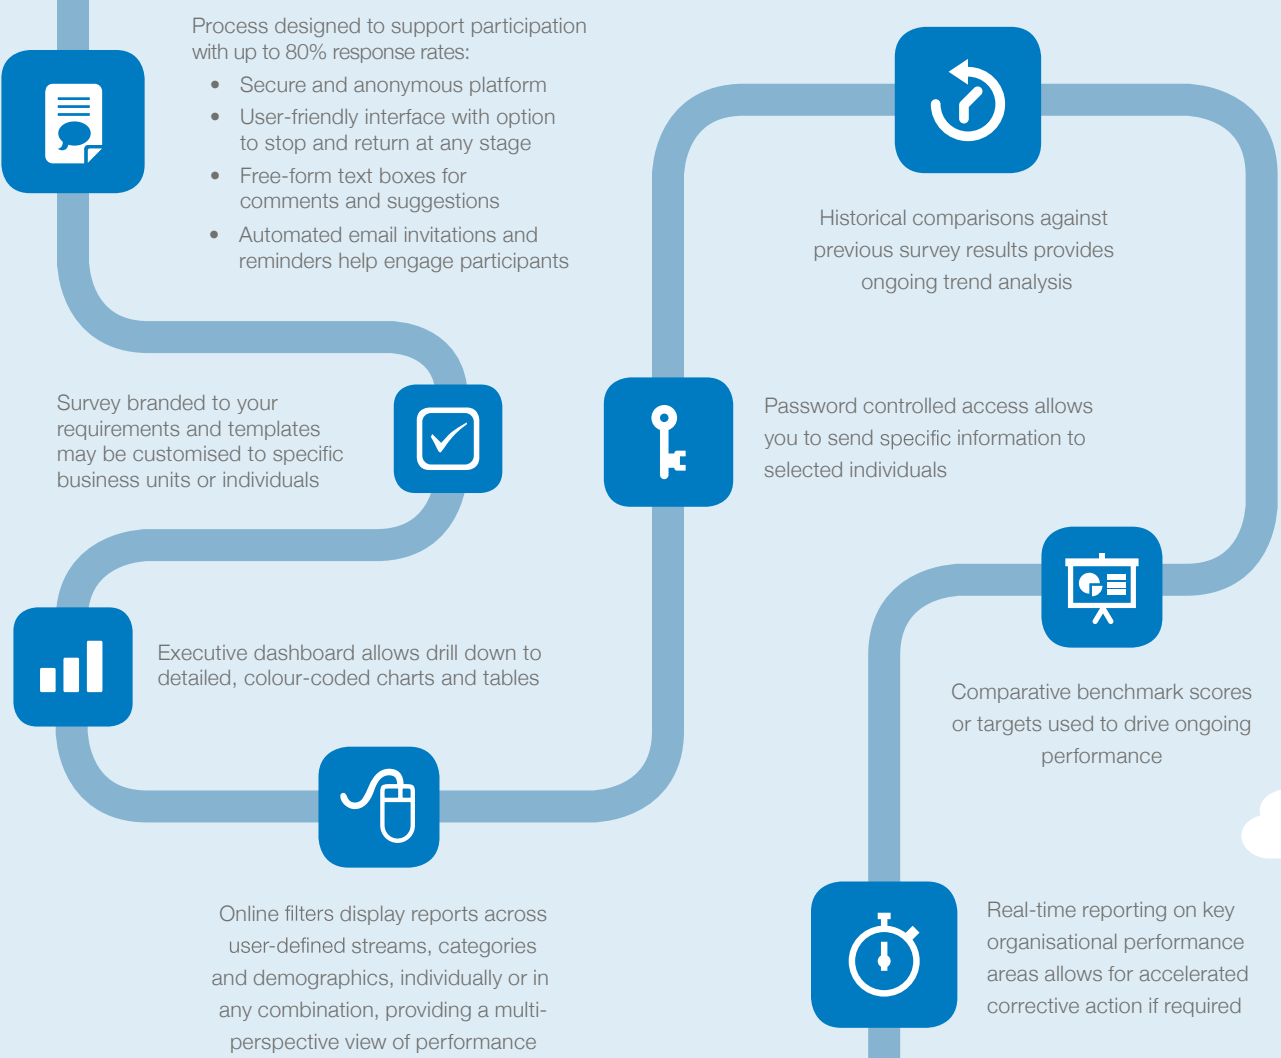

Results are monitored via an online dashboard. Real-time reporting with detailed drill-down capability gives you a holistic view of alignment in key organisational performance areas.

You get instant, objective information on what is and what isn't working in your business. Insights create opportunity for deep analysis, informed tactical plans and accelerated action.

### How it works

Speed, simplicity and detailed information make eValue® a cost-effective way to get a holistic view of organisational performance.

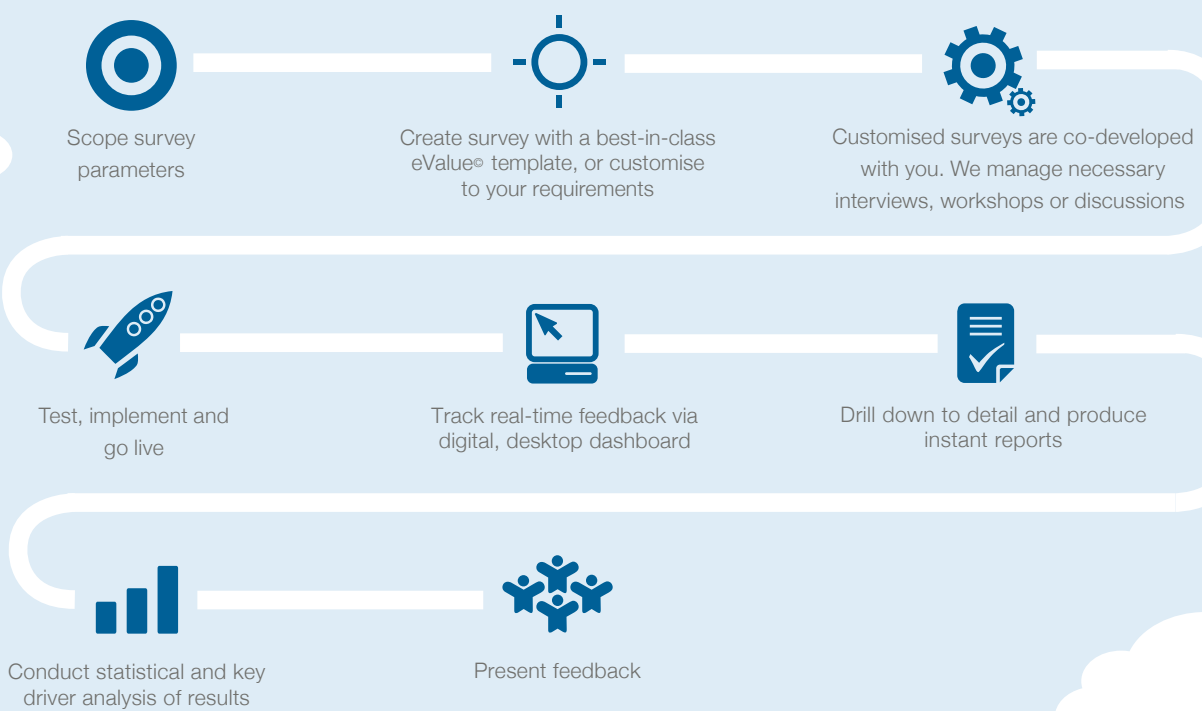

### eValue® generates immediate and powerful online reports

- Coded spread of responses
- Comparative reports
- Drill-down functionality
- Detailed reports
- High level summaries
- Strategy maps

### Simple process, instant results

Implementation is simple, speedy and fully supported by our project team

### Why Achievement Awards Group

Global track record of successful eValue® survey implementation

Comprehensive implementation supported by our team of performance management experts, statisticians and analysts, business executives and IT system developers

### Food for thought

eValue® analysis generated cost-effective improvements for a major motor industry client:

- 74% response rate compared to 10% - 25% industry norm
- 95% confidence level in accuracy of sample representation
- Survey highlighted several major supply and delivery issues, resulting in detailed review and overall improvement in efficiency and related costs
